

LANCOM LN-860

Dual-radio enterprise-class 11ac Wave 2 Wi-Fi access point with up to 867 Mbps – 100% Cloud-ready

The LANCOM LN-860 is a high-performance 11ac Wi-Fi Wave 2 enterprise access point. Based on the Wi-Fi standard IEEE 802.11ac Wave 2, this device significantly increases the efficiency of any wireless network. Featuring Multi-User MIMO, it allows all of the available streams to be used by several clients at the same time. The clients also benefit from beamforming for a better signal. The LANCOM LN-860 provides fast Wi-Fi to 11n-clients in the 2.4-GHz frequency band as well as the growing number of 11ac-enabled devices in the 5-GHz band. On top of that, the access point can be versatilely operated: it can be orchestrated via the LANCOM Management Cloud, centrally managed by a WLAN controller or operated as a stand-alone device.

- Dual concurrent Wi-Fi – parallel operation at 2.4 and 5 GHz with up to 867 Mbps with IEEE 802.11ac Wave 2 and 300 Mbps with IEEE 802.11n
- 2x2 Multi-User MIMO for simultaneous beam-steering for multiple clients
- Beamforming steers the signal towards the Wi-Fi clients
- Supports 160-MHz channel width
- Dynamic WLAN optimization thanks to LANCOM Active Radio Control (ARC)

LCOS 10.80

LANCOM LN-860

Dual concurrent Wi-Fi with up to 867 Mbps

The LANCOM LN-860 features two Wi-Fi radio modules, one offering IEEE 802.11ac Wave 2 and the other offering IEEE 802.11n. This provides fast Wi-Fi to 11n-clients in the 2.4-GHz frequency band and also the growing number of modern 11ac-enabled devices in the 5-GHz band.

2x2 Multi-User MIMO

Multi-User MIMO (MU-MIMO for short) simultaneously distributes all of the available spatial streams of the LANCOM LN-860 between several different Wave 2 clients, rather than one after the other as was formerly the case. The available bandwidth is used more efficiently and delays in the wireless network are substantially reduced.

Beamforming

The LANCOM LN-860 uses beamforming to actively steer the signal to the clients and minimize interfering radio signals for other clients. In combination with MU-MIMO, the clients receive dedicated spatial streams with a minimum of interference, which positively influences the data rates for all of the clients.

160-MHz channel width

Increasing the channel width from 80 to 160 MHz doubles the performance for Wave 2 clients. By optimizing the use of the radio spectrum, a client can be supplied with a data rate of up to 867 Mbps.

Active Radio Control for dynamic radio-field optimization

The LANCOM LN-860 supports the WLAN optimization feature LANCOM Active Radio Control. This intelligent combination of innovative features included with the LCOS operating system—such as Band Steering, Adaptive Noise Immunity, Adaptive RF Optimization, Airtime Fairness and Client Steering—sustainably increases WLAN performance and supports administrators with professional tools for WLAN management.

LANCOM security for wireless networks

With numerous integrated security features, such as IEEE 802.1X, this enterprise-class access point provides optimal security for networks. Administrators and employees alike benefit from professional security policies on the network.

Operation via LANCOM Management Cloud, WLAN controller or stand-alone

The LANCOM LN-860 can be versatily operated: Managed via the LANCOM Management Cloud it is integrated into a comprehensive, automatized network orchestration, based on Software-defined Networking technology. It can also be operated via a LANCOM WLAN controller or be applied in stand-alone operation.

LANCOM LN-860

Layer-7 application detection

Knowing what the bandwidth in your network is actually being used for can be crucial in any industry. Layer-7 application detection gives you a completely transparent overview. This means that the user-friendly LANCOM Management Cloud delivers clear and professional insight into exactly which applications (such as YouTube, Netflix, etc.) are operating anywhere on the network—true added value for all-round network monitoring.

Elegant LANCOM design with integrated antennas

The white LANCOM LN-860 has a fascinating, puristic elegance. Its modern design is ideal for unobtrusive operation in any industry as it blends seamlessly into any environment.
