LANCOM 1781AW

Business VPN router with ADSL2+ modem

With its integrated ADSL2+ modem, the LANCOM 1781AW connects to a normal ADSL connection to provide professional Internet access for businesses, offices and retail stores.

Wi-Fi based on IEEE 802.11n

Featuring IEEE 802.11n Wi-Fi, the LANCOM 1781AW provides wireless networking to clients in the 2.4- or 5-GHz frequency range at speeds of up to 300 Mbps. Secure wireless LAN with the LANCOM 1781AW is assured by its wide range of supported security standards including IEEE 802.1i (WPA2) and IEEE 802.1X. Thanks to multi-SSID, the wireless LAN also supports multiple networks that are securely separated from one another.

Secure site connectivity via VPN

The LANCOM 1781AW offers high levels of security. The standard equipment of 5 IPSec VPN channels guarantees strong encryption, secure connections for mobile employees, and protection of corporate data. The LANCOM VPN option upgrades the router to support 25 VPN channels. This ensures that your network is perfectly scalable and can grow on demand—without additional hardware components.

Stateful inspection firewall

Equipped with a stateful inspection firewall, the LANCOM 1781AW protects the entire network. With features such as intrusion prevention and Denial-of-Service protection, this business VPN router provides optimal protection and secures all of the data on the network.

Advanced Routing & Forwarding

The LANCOM 1781AW provides up to 16 securely isolated IP contexts, each of which has its own separate routing. This is an elegant way of operating IP applications with one central router and keeping the different communication channels securely separated from one another.
