① VDSL / ADSL interface
Use the supplied DSL cable for the IP-based line to connect the VDSL / ADSL interface and the provider's telephone socket. For more information, please contact your Internet service provider.

② Ethernet interface
Use the cable with the green-colored connectors to connect one of the interfaces ETH 1 to ETH 4 to your PC or a LAN switch.

③ Analog interface
Connect analog terminal devices to the analog interfaces either directly via RJ11 or with the help of the enclosed TAE adapter.

④ Serial interface
Configuring the device via the serial interface requires a serial configuration cable (available as an accessory).

⑤ ISDN interface
ISDN 1
Internal (NT) or external (TE) ISDN bus. This feature is controlled by LCOS.

ISDN 2
Internal (NT) ISDN-bus.

A 100-Ohm resistor for line termination is switchable in LCOS.

⑥ USB interface
You can use the USB interface to connect a USB printer or a USB drive.

⑦ Power
When connecting the cable to the device, turn the bayonet connector 90° clockwise until it clicks into place.

90°
