

LANCOM 1926VAG-4G Quick Reference Guide

- ① **4G / LTE antenna connectors**
Connect the supplied cellular antennas to the connectors at the front of the device.
- ② **G.FAST / VDSL / ADSL interfaces***
If required, use the supplied DSL cables for the IP-based line to connect each G.FAST / VDSL / ADSL interface to a separate provider's telephone socket. For more information, please contact your Internet service provider.

* Please use the appropriate cables depending on the design
- ③ **WAN 1 interfaces (SFP / TP combo port)**
Insert a suitable SFP module (e.g. 1000Base-SX or 1000Base-LX) into the SFP port. Choose a cable compatible with the SFP module and connect it as described in the module's documentation. SFP module and cable are not included.
If desired, alternatively connect the WAN 1 TP interface to a WAN modem using an ethernet cable.
- ④ **WAN 2 interface (TP)**
Connect the WAN 2 interface to a WAN modem using an Ethernet cable.
- ⑤ **Ethernet interface**
Use the cable with the kiwi-colored connectors to connect one of the interfaces ETH 1 to ETH 4 to your PC or a LAN switch.
- ⑥ **Analog interfaces**
Connect analog terminal devices to the analog interfaces either directly via RJ11 or with the help of the enclosed TAE adapters.

- ⑦ **ISDN interfaces**
ISDN 1: Internal (NT) ISDN bus
ISDN 2: Internal (NT) ISDN-bus

A 100-Ohm resistor for line termination is switchable in LCOS.
- ⑧ **SIM card slots**
Slide the SIM card(s) into slot SIM1 or SIM2 using the marker to ensure that the card is the right way round. Ensure that the SIM card clicks into place on insertion. To remove the card from the device, press the card lightly into the device. Let go to release the SIM card from the slot.
- ⑨ **Configuration interface**
Use the included serial configuration cable to connect the serial interface (COM) to the serial interface of the device you want to use for configuring / monitoring.
- ⑩ **USB interface**
You can use the USB interface to connect a USB printer or a USB storage device.
- ⑪ **Power connector and grounding point (device back side)**
Supply power to the device via the power connector. Please use the IEC power cable supplied (separately available for WW devices).
- ⑫ **ATTENTION:** High touch current possible! Connect to earth before connecting the power supply.
